

The heatmap displays a 19x19 grid with a color scale ranging from dark blue (low values) to yellow (high values). The x-axis is labeled 1 to 19, and the y-axis is labeled 1 to 19. The visualization shows a distinct pattern of high values (yellow/orange) concentrated in the top-right corner, specifically in the region where x is between 11 and 19 and y is between 1 and 4. A vertical strip of light blue cells is visible in the middle of the grid, around x=13 to x=15 and y=11 to y=15. The majority of the grid, particularly in the bottom-left and bottom-right, shows low values represented by dark blue.
